

JACARDI Third Annual Meeting 2025

✦ Malta is proud to have taken part in the third General Assembly of the Joint Action on Cardiovascular Diseases and Diabetes (JACARDI), held in Madrid from 14–16 October 2025. Malta is involved in WP6 – Health Literacy, WP 10 – Self management and WP8 – Screening.

JACARDI is a comprehensive global initiative dedicated to enhancing cardiovascular health, alleviating the burden of cardiovascular disease (CVD) and diabetes, and generating actionable knowledge to inform healthcare practices worldwide. Our mission focuses on prevention, early detection, and the dissemination of care through evidence-based interventions, innovative tools, and shared expertise, aiming for a sustainable impact in managing these conditions.

This important gathering brings together more than 200 experts and representatives from 21 European countries, including national health authorities, the European Commission, the World Health Organization, scientific societies, and patient organisations. A unique opportunity to advance collaboration in the prevention and management of cardiovascular diseases and diabetes.

This event provided a perfect occasion to share knowledge, discuss early results from JACARDI's 143 pilot projects, and explore innovative pathways for improving health equity, sustainability, and integrated patient care across Europe.
